

KALESA

TECHNOLOGIES

Connecting people with
technology

CAPABILITY STATEMENT

Kalesa Group, LLC dba Kalesa Technologies

5475 Beaver Ridge Drive, Cumming, GA 30040

sales@kalesagroup.com | (770) 877-1050 | www.kalesagroup.com

MISSION

Our mission is to connect people with technology in ways that strengthen operations, improve access, and empower mission-driven outcomes. We believe technology should remove barriers, not create them — whether supporting a veteran's care journey, enabling secure communication across defense networks, or modernizing public health systems. By integrating IT, telecom, and healthcare technologies into unified, user-centered experiences, we help agencies overcome outdated infrastructure, fragmented systems, staffing shortages, cybersecurity threats, and growing demand for modern services.

CORE COMPETENCIES

General IT Services

- Enterprise-grade Project & Program Management supporting mission-critical IT initiatives
- End-to-end hardware and software procurement, installation, and commissioning (domestic & international)
- One-time professional IT consulting for modernization, optimization, and system integration
- IT lifecycle support ensuring personnel can perform their duties without being hindered by outdated tools

Telecom Services

- Telecom Project & Program Management for voice, data, and network infrastructure
- Procurement, installation, and commissioning of telecom hardware/software across multi-site environments
- One-time telecom engineering and consulting services
- Modernization of legacy telecom systems to eliminate communication bottlenecks and ensure secure, uninterrupted connectivity

Healthcare IT Services

- Healthcare IT Project & Program Management aligned with clinical and administrative workflows
- Electronic Health Records (EHR) management, optimization, and interoperability support
- Telemedicine platform deployment, integration, and operational management
- Digital health support enabling clinicians to focus on care — not on navigating broken systems

DIFFERENTIATORS

- Mission-aligned focus on connecting people with technology across federal and SLED environments
- Ability to deploy teams domestically and internationally
- Strong alignment with VA, DoD, Air Force, Army, CDC, and State of Georgia modernization priorities
- Rapid procurement and deployment of hardware/software with minimal operational disruption
- Healthcare IT expertise including EHR systems, telemedicine platforms, and clinical workflow support
- Scalable delivery model supporting one-time engagements or long-term managed services
- Small Business agility with competitive pricing, fast turnaround, and flexible contracting options
